

Thank you for downloading the Heritage Hardware ArchiCAD objects.

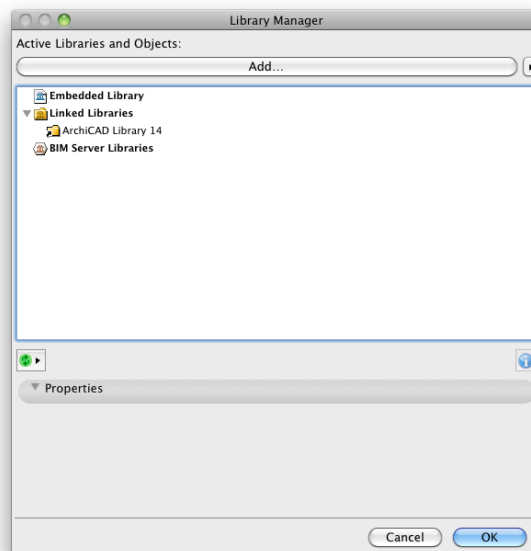

These allow you to quickly and easily use Heritage Hardware's great range of sinks & screen lifters directly into your ArchiCAD projects.

These objects require ArchiCAD 12 or higher and work on both Macs & PCs.

If you have any trouble adding the files or have feedback on how we can improve them, please feel free to contact us at support@barringtonarch.com or phone: 03 366 4131

To add the files simply:

1. Unzip the download file
2. Add the .lcf (ArchiCAD library container file) to your project using ArchiCAD's library manager (screen shot below). Or if your company uses a central library on a server, simply add the .lcf file to your central library folder.

3. The entire Heritage Hardware range will now appear within your ArchiCAD object manager.

For more info on Heritage hardware's great product range visit: www.heritagehardware.co.nz or phone:
