Is your office chair **KILLING YOU?**

“People who sit for prolonged periods in their work and/or recreation risk developing a potentially life threatening syndrome called S.I.T. (Seated Immobility Thromboembolism) syndrome. This is now a 21st century lifestyle hazard”, say professors from The Medical Research Institute of New Zealand.

FREQUENTLY ASKED QUESTIONS

What are these Rise-Easy electric height adjustable sit-stand desk frames all about?

A unique range of desk frames with electric height adjustment from 650mm to 1180mm, which is quite simply to allow sitting to full standing height to suit 99% of the population.

What are the reasons and benefits of choosing one of these?

There are many; here are a few:

- Prevent back problems – standing for part of your day can offer great relief and help back pain recovery
- A must for wheelchair users – persons of different heights can easily adjust to suit their needs
- Pins and needles in your legs? Rise-Easy at the push of the button – take a stand and stay alert... embrace today's ergonomics
- Huge advantage when 'hotdesking' or in shift-working environments
- Increase efficiency – have stand-up meetings with your team, which are proven to be more efficient
- Increase staff productivity with reduced fatigue and comfort
- Prevent S.I.T. (Seated Immobility Thromboembolism) Syndrome

REAL WORLD RESULTS!

“As a result of a recent back injury I am unable to sit for more than about 20 minutes without standing or moving round.

My Occupational Therapist James came to review my condition and saw one of your catalogues featuring the desk lifter. He was impressed with their simplicity of application and operation.

As a result my therapist supplied a Electric Height Adjustable Desk. It is brilliant. The desk can be raised or lowered to suit whatever position is required to work at comfortably, whether sitting or standing.

Thank you very much.”
